

- *Was the ship intentionally destroyed?*
 - *Was there something onboard the ship they didn't want getting out?*
 - *If so, what? Was someone going to leak information?*
 - *What kind of thing would they want to keep secret? Smuggling, embezzling?*
 - *Check captain's logs.*
- *Were there any survivors at all?*
 - *Where are they? How many shuttles are left? What supplies were left behind?*
 - *How could they survive?*
- *Were the life support systems failing?*
 - *Check air and water quality, are there any toxins present?*
 - *Check other systems as well- has anything been altered? Could anything be altered?*
 - *Sabotage?*
 - *Was routine maintenance being performed?*
- *Figure out if the a.i. can be hacked.*
 - *Ask it if it keeps its own separate logs and if they can be manipulated.*
 - *Be cautious, don't know how it'll react. What if it was the thing that destroyed the ship?*
